THE ASPIRE CURRICULUM

It is our intention that every course at every level, in every subject and for every cohort will meet the standard set out below.

AMBITION

The college will be clear that every course is simply a stepping-stone into the next stage of a learner's career.

We will constantly and consistently espouse the value of achieving the highest grade possible and will encourage our partners, particularly employers and universities, to do the same.

We will strive to understand and meet the needs of every student so that no teachers or specialists feel obliged to set lower targets for those in disadvantaged groups.

SUCCESS IN LIFE

The college will support learners in acquiring good habits for learning and for future employment. These will be appropriate to the level of study and the next stage of learning.

We will show our students that we believe in them and their ability to succeed in life.

We will encourage and support every student in improving their maths and English skills.

PLANNING

Each course will be constructed so that skills, knowledge and attributes will build up coherently, logically and progressively.

Whilst allowing students to choose their own path, every course, however short, will have at least one clear progression route mapped to it, into which students will be supported.

The classroom-based curriculum will provide high-quality preparation for progression onto an apprenticeship.

The curriculum will provide progression from one level to the next, including from FE into HE.

Our subcontractors will be incentivised to ensure that their students progress onto purposeful learning at a higher level, including college courses whenever appropriate.

INDIVIDUAL NEEDS

We will consider the needs of all disadvantaged groups in designing and delivering our curriculum and in providing support.

We will train teachers and support staff well to meet the needs of our most vulnerable learners, including those with learning difficulties and disabilities, those who may have suffered early childhood trauma, and those who may have struggled to engage in formal secondary education, to ensure that all learners can fully access the curriculum. Where necessary, these learners will receive individualised personal support to enable them to gain as much as possible from their learning experience.

We will identify the most able learners in every group and encourage them to aim high, broaden their learning, and achieve great outcomes which align with their potential and their aspirations.

We will respond to students who disengage from their learning in any way by first seeking to understand and then working with them to adjust our approach and provide support, whilst maintaining the high expectations which will enable them to thrive.

RELEVANCE

We will develop partnerships with local, regional and national employers to enable them to contribute fully to the design and delivery of courses across the college curriculum.

We will use our resources effectively to understand the nature of the future jobs market in order to best prepare and advise our learners for prosperous futures.

We will use the talents of our teachers and the resources at our disposal to develop talented employees who will support their employers to compete in a changing and technological context.

We will help every student to find something they're good at, to build their self-confidence and self-esteem and to enable them to thrive.

EXCELLENCE

We will embolden our staff to be creative in their practice in order to provide students with a high-quality learning experience, wherever and whatever they are studying.

We will encourage our staff to share their successes and areas for development with colleagues in order to learn as much from one another as we can.

We will use our deep dives to identify the best practice and use this to support those whose performance may not yet be at that level.

EMPOWERMENT

We will empower our staff to be creative in their practice in order to provide students with a high-quality learning experience, wherever and whatever they are studying.

We will empower our staff to take control of their own professional development by sharing their professional practice expertise with colleagues.

We will empower our students to shape their own development through flexible use of the study programme, enrichment and employer engagement.

This strategic curriculum intent will be developed for specific groups of learners, including education programmes for young people, adult learning programmes, apprenticeships, provision for learners with high needs, and higher education.

Curriculum teams will be asked to consider how this framework can be used to ensure that their courses play a part in taking the college towards achieving its vision.
