

USING MATHS IN...

CARPENTRY AND JOINERY

WHAT YOU'LL NEED TO KNOW...

- You will need to have an ability to calculate linear length, work out square and cubic meters for area, volume and quantity of materials.
- You'll need to work to plans, work to time schedules agreed with customers.
- Accuracy with arithmetic is vital when adding, subtracting, dividing and multiplying measurements and quantities.

Without these skills you could be limiting your opportunity to progress in your career.

In carpentry and joinery there are two sides to the trade - site carpentry (fitting and repairing) and architectural bench joinery (making items in the workshop).

Starting salary for a Joiner could be **£14,000+** to **£35,000+** p/a depending on experience and ability.

*these figures are a national guide only

So don't miss out on your GCSE and functional skills maths classes identified on your timetable.

USING ENGLISH IN...

CARPENTRY AND JOINERY

WHAT YOU'LL NEED TO KNOW...

- To take customer requirements and put them into practice your communication and listening skills need to be professional with the correct use of language and terminology to ensure you can bring the plans to fruition.
- You need to communicate with customers over the telephone, by email and social media so you need to speak and write in a professional manner, with correct use of spelling and grammar.
- To be able to understand technical terms in specifications and understand architects drawings.

Without these skills you could be limiting your opportunity to progress in your career.

In carpentry and joinery there are two sides to the trade - site carpentry (fitting and repairing) and architectural bench joinery (making items in the workshop).

Starting salary for a Joiner could be **£14,000+** to **£35,000+** p/a depending on experience and ability.
