

Dear new student

For the past two years I have been a student at West Notts College. In my first year I started on the stepping stones course and I was extremely anxious about coming to college but you adjust to the environment quite quickly. Now that I'm on my second year I am on the Level 1 IT course and I feel much more comfortable at the college.

Throughout the past two years I have only ever had amazing tutors who will support you through whatever you require help with. At the moment my tutors have been helping me try to find a job and or get an apprenticeship.

Lastly I would recommend West Notts College as a place to study due to its friendly and understanding staff/tutors.

Yours sincerely
