

Dear new student

On the course that I'm doing you will learn more about animals and how to look after them and also how to wash and brush them. You will also learn about reptiles, mammals and birds and learnt about the differences between them and learn more facts about them because this all goes towards helping you in a job working with animals that you like.

What we do on the course is work on animal care booklets and make donations to charities to do with animals and we also go to animal farms to learn what they do there and do jobs like cleaning the goat pens, ponies, chickens and other animals.

I like this course because you can learn more things about animals that you didn't already know, you get involved in charity events as well as making new friends in your new class to talk to and have lunch with so you can feel welcome there so you can have fun and have laughs.

Regards

Grace Davis
