

Dear student

Animal care is an obvious choice for those who've always dreamed of working with animals.

Our animal care course will give you the knowledge and skills needed to succeed in the animal care sector.

You will learn about a range of different skills required to care for many different types of animals. Working with animals is a rewarding and exciting career and the animal care course is perfect for helping to learn how to carry out many different tasks and skills required to work in this role.

You will have an opportunity to work with animals such as goats, rabbits, guinea pigs, ponies, rats, quails and many others at the farm on practical days and you'll help them by getting involved in fundraisers.

In college you will learn about animals in general, health and safety work, grooming and restraining and many other things.

Tutors will always help you and guide you to make sure you will achieve the goals you set. Also, they will make sure you're heading in the right direction for your grades.

College work will give you a chance to express yourself, develop your skills, knowledge and opinion. Your thoughts and opinions will be respected.

You will also have two four-legged friends to care for and walk them outside the college during the lesson. Coco and Reggie are two amazing animals who won't let you get bored on lessons, especially when they will be there in lessons with you.

If you have any issues, problems or difficulties the college staff will help you to solve the problem, get back on-track to study and achieve your goals.

Lots of experience and college work will help you to get the best result and progress, to move on in the animal care industry.

Linda K
