Oxford English Dictionary definition:

“The practice of taking someone else's work or ideas and passing them off as one's own.”

Referencing and Plagiarism

Harvard Referencing

- When you quote or paraphrase, in your work, something written or created by someone else it is vital that this is recorded, either within the sentence or at the end of it.
- All sources should be acknowledged including books, journals, websites, videos, recordings, social media, tv or radio programmes, blogs, discussion group, email (with permission) – if in doubt, reference it.
- Reference as you work, it will save time later.
- You could photograph or screen shot reference details to use later.

This is how to order your reference:

Author/*date*/*title*/edition/publisher

Japan nuclear crisis: Xenon detected at Fukushima plant

By Roland Buerk
BBC News, Tokyo

A radioactive gas has been detected at Japan's crippled Fukushima nuclear plant, the facility's operator says.

Tepco said xenon had been found in reactor two, which was previously thought to be near a stable shutdown.

There has been no increase in temperature or pressure, but the discovery may indicate a problem with the reactor.

Officials are not yet sure if the readings pose a problem.
